VPN setup on your Android device

Please note that some options may vary depending on your make, model, android version, as well as any theme and/or settings that you may have applied to personalize the device for yourself.

1. Navigate to the settings option of your device and click on Connections or whichever option is applicable to you for adding a connection to your device. Navigate and find the setting called More connection settings and click on it.

2. Click on VPN and select ADD VPN or whichever VPN option is applicable to you.
